

Be Included in Autism Research

The Academic Autistic Spectrum Partnership in Research and Education (AASPIRE) and the Gernsbacher Lab believe in **research *WITH* autistic adults, not just *ABOUT* autistic adults.**

Together, we have created the Gateway Project, which is an online gateway to research that

- encourages the inclusion of autistic adults in matters that affect them;
- includes autistic adults as equal partners in research about autistic persons;
- answers research questions that are considered relevant by the autistic community;
- uses research findings to effect positive change for people on the autistic spectrum.

The Gateway Project needs your help, whether or not you are on the autistic spectrum.

If you're at least 18 years old and have access to the Internet, you can participate in a series of online research studies. Upcoming studies address topics such as healthcare, well-being, and problem solving.

To participate in the Gateway Project:

1. Register online for a Gateway account starting at <http://www.thegatewayproject.org>
2. Take the online Gateway Survey. The survey takes about 20 minutes to complete.
3. You will be notified by email when new studies for which you are eligible become available.

Completing the survey entitles you to a 1 in 25 chance to win a \$25 Amazon.com gift certificate.

If you would like to learn more about the Gateway Project, you can

 Go to the Gateway home page at <http://www.thegatewayproject.org>

 Send an email to info@thegatewayproject.org

 Make a telephone call to Dr. Morton Ann Gernsbacher at 1-608-262-6989 or Christina Nicolaidis at 1-503-494-9602
